Regional Burn Center

2nd Annual Burn Symposium
The Road to Recovery: An Outpatient Multidisciplinary Approach

UC Irvine Student Center, Campus
311 W. Peltason Drive, Irvine, CA 92697

Saturday, April 29, 2017 | 7:30 a.m.–4:15 p.m.

Presented by UC Irvine Health Rehabilitative Services Department
Course Description

This full-day, live course will address the multidisciplinary approach to the care of patients with burn injuries. It will focus on the sequence of progression of care from the acute hospitalization to post-discharge with an emphasis on provision of care in the outpatient clinic setting. Topics will cover scar management and function, psychosocial considerations and barriers to community reintegration.

This course is designed to offer both lecture and lab education to prehospital emergency responders and healthcare providers in the clinical setting.

Learning Outcomes

Upon course completion, attendees will be able to:

- Describe current innovations in burn care for partial-thickness injuries
- Summarize the potential role of lasers for treatment of burn scars
- Differentiate the normal and abnormal scarring sequelae
- Identify treatment options for pediatric scar management
- Discuss long-term psychosocial aspects experienced by survivors of burn injury
- Detect three signs and symptoms of child abuse in the burn population
- List three main barriers survivors face when reintegrating to post-burn life
- Summarize the role of child life in improving pediatric outcomes
- Identify appropriate burn dressings on wound appearance and burn depth
- Name two to three benefits survivors of burn injuries may experience with pressure garment usage as part of their scar management regimen
- Identify adjunctive therapies to minimize pruritus
- Explain the intensity of therapy required to progress the burn patient
- Express an increased knowledge of the firefighter and survivors’ perspectives
- Identify appropriate burn dressings based on wound appearance and burn depth.
